FISCAL ANALYSIS

ASSUMPTION

Officials of the **Department of Economic Development - Division of Motor Carrier and Railroad Safety** assume the proposal would not have fiscal impact on their agency.

Officials of the **Department of Transportation (MoDOT)** note that concrete pump trucks and well-drilling equipment are currently being issued single-trip permits to operate on the state roadways. They assume the number of vehicles currently operating will remain the same and that the manner of operation will not change. Therefore, there should be no increase in the overall cost of maintaining the roadway surfaces and bridges of the state. However, MoDOT cannot provide an estimate of the loss of revenue that would be realized from changing the \$34 special permit issued per trip to a \$100 permit per year for each vehicle.

Oversight notes that the proposal provides for a single-use permit or an annual permit upon request of the owner. It provides for MoDOT to set the fees for the permits, but no fee amount is specified. Therefore, Oversight assumes that MoDOT would establish annual fees that would approximate current amounts collected on an annual basis for single-use permits. Fiscal impact is assumed to be zero.

DESCRIPTION

The proposal would allow the Department of Transportation to issue annual permits for transporting concrete pump trucks and well-drilling equipment.

This legislation is not federally mandated, would not duplicate any other program and would not require additional capital improvements or rental space.
